**MR. STEWART'S LONG
PARLIAMENTARY RECORD**

The Hon. Charles Stewart, Liberal candidate for the Edson Jasper Federal Riding, was born in the Province of Ontario. Over 30 years ago he came to Alberta and took up a homestead, later farming near Killam. He became a member of the Provincial Legislature in 1909, and took over the Premiership in 1917, in which capacity he served until 1921, when he entered the Dominion field, becoming Minister of the Interior and Mines.

Hon. Charles Stewart.

Every year during his administration of the affairs of Alberta as Premier this Province had a surplus on its yearly operations.

From 1921 to 1930 Mr Stewart was a member of the Treasury Board at Ottawa, and during that period a large reduction was made in the national debt. From 1930 to 1935 Mr Stewart served as Federal member for West Edmonton. He is a man who knows the needs of the Western farmer, and has also had a wide experience in the affairs of government. Such men as Mr Stewart are well qualified to express and support measures for the benefit of the West.

On the Air.

Now that the Radio season is upon us, Mr A E Michael is introducing new models of the Rogers, DeForest Crosley, and Majestic, for which he has been the agent for a number of seasons. These new models will shortly be on display at the show room of Stony Plain Hardware, and to which the public are invited to come, inspect, and get a demonstration. The dealers in these machines in Northern Alberta are Federal Riding have nominated James A Reid, one of the party's leading organisers, for the election on Oct. 14 next. As a result, 5 parties are now contesting the seat: Liberals, Conservatives, Stevens Party, C. C. F. and Social Credit.

J. A. Reid for W. Edmonton.

Mr Reid has been active for a considerable period in organising Social Credit forces, and made a number of friends in Stony Plain constituency during the campaign which preceded the recent provincial election.

"THE WORLD IN DANGER" TEA

The World In Danger

As week succeeds week the possibilities of war between Italy and Ethiopia grow nearer to certitude and the situation becomes fraught with alarming menace, not merely to the two countries involved but to other countries and possibly the whole civilized world.

With the Italian representatives rejecting, one after another, proposals which are being made almost daily by committees of the League of Nations and interested powers in the hope of averting an outbreak of hostilities, and Emperor Haile Selassie refusing to accept any compromise which would result in the surrender of the independence of his kingdom, the situation becomes more and more gloomy, and the gloom deepens with the active preparations which are being prosecuted by Mussolini and the belligerence with which he is whipping his countrymen into a warlike attitude.

Statesmen of the leading nations of the world and international authorities appear to be in complete accord with the general consensus of world opinion that such a conflict would not be confined to Italy and Ethiopia, but that other nations would be dragged into the fray and that it is even likely to lead to a general conflagration which would result in misery and suffering to millions and loss of life and property on an even greater scale than the Great War of 1914-18.

Indeed, there are authorities who see in the present situation a potential destruction of civilization itself. This view is supported by the Committee on International Law of the Canadian Bar Association, which in a report to the Canadian Bar Association convention in Winnipeg recently spoke of "the consequences to the world and Canada of an actual resort to arms" as probably "catastrophic in the sense that it may include the destruction or profound modification of many of the institutions upon which civilization is based."

Again in the same report, the committee dealt with the conduct of Italy as indicating that government's unwillingness to accept decisions of the Council of the League of Nations, of which she is a member, in the following words:

"If that attitude persists the world may be faced with a complete breakdown of the system of public international order which was supposed to have been permanently established by the sacrifices of the years 1914 to 1918.

"The question is whether or not the peoples of the world will permit this by failure to agree on united action or whether, by united action, they will, as they undoubtedly can, insist upon the observance of the public law upon which the continuance of our present civilization may depend."

The statement that the peoples of the world can avoid this catastrophe by united action refers to the powers which the member countries of the League vested in themselves when they approved Article 16 of the covenants, to which all members have subscribed, agreeing to impose financial and economic sanctions as a punitive measure against any member who breaks the covenants and commits an act of aggression against any other country.

In view of the menace of the situation the importance of these powers become paramount. They are contained in the first and third paragraphs of Article 16 and read as follows:

"1. Should any Member of the League resort to war in disregard of its covenants under Articles 12, 13 and 15, it shall, ipso facto, be deemed to have committed an act of war against all other members of the League, which hereby undertake immediately to subject it to the severance of all trade relations, the prohibition of all intercourse between their nationals and nationals of the covenant-breaking State, and the prevention of all financial, commercial or personal intercourse between the nationals of the covenant-breaking State and the nationals of any other State, whether a Member of the League or not."

"2. The Members of the League agree, further, that they will mutually support one another in the financial and economic measures which are taken under this Article, in order to minimise the loss and inconvenience resulting from the above measures, and that they will mutually support one another in resisting any special measures aimed at one of their members by the covenant-breaking State, and that they will take the necessary steps to afford passage through territory to the forces of any Members of the League which are co-operating to protect the covenants of the League."

It is not perhaps generally known that the onus of deciding whether an act of aggression or incident is to be construed as "an act of war" within the meaning of the covenants is left with each individual member to decide. A clause was drafted some years ago vesting the decision with the Council but this has never been ratified by the League.

However, once a member has decided that some act or incident is an "act of war" it is an alternative, under the covenants, but to proceed with the measures outlined in Article 16. Otherwise, that country has itself violated the covenants.

With the onus of interpretation of an "act of war" left upon each individual member, the importance of the general public being fully posted on events as they transpire, can readily be understood, as in the final analysis, it is the people of each country involved who are in the position by their influence, to decide what part their country shall play in the efforts to avert a major catastrophe.

Village Needs Pied Piper

Fifty rats a night are being killed in the village of Chilton, England. All the men have enlisted into an anti-rat army to combat the ravages of the rodents, which have laid siege to one farm and have become a plague. So far the rats have won.

Caked Under Cleared

Overlooked California and Minnesota's revolutionary road for treating caked rubber, leather, and other goods in stable and house.

New Variety Of Dahlia

A Siamese-twin dahlia, which may be the forerunner of a new variety of this autumn flower, was displayed at Victoria recently. The freak bloom was grown by Mrs. W. G. Gordon of Sooke, B.C. It is two flowers joined together at the calyx. The dahlia is of the pom-pom variety and the back-to-back flowers almost form a solid ball of pink petals. Plant experts termed it a queer aberration of nature.

Spectators Were Scared

An artist's zeal brought a police car and ambulance halted by a Boston office building. Perched high on a roof, painting a skyscraper view of the waterfront, the young artist did not know that office workers called police to halt his "suicide."

A Great Astronomer

Dr. Anna Cannon Has Classified Over 400,000 Stars

That astronomy is not so exact a science that the average man would not be interested were information readily available, is the opinion of Dr. Anne J. Cannon, of Harvard, who was in Toronto as a delegate to the American Astronomical Society's convention.

For 50 years Dr. Cannon has been gazing through telescopes and the mystery of the heavens has as great a thrill for her as ever. Dr. Cannon is the most famous woman astronomer in the world, and she has shared with Madame Curie of France and other equally famous the honor of receiving the Elihu Richards' prize for outstanding work by women in research.

She was the last recipient of the prize, which was founded to encourage women to study science. But because it was felt women no longer needed encouragement to enter, it was discontinued. Dr. Cannon has continued it, however, for women in astronomy. It is called after her now, and it goes to women astronomers.

The prize was given Dr. Cannon for classification of stars according to their spectra. She has classified over 400,000. Harvard is now a mecca for astronomers all over the world who seek astronomical observations of spectra.

An Intricate Problem

Joining Of Steel Plates On Liner Queen Mary Requires Study

Construction of the new Cunard White Star super liner Queen Mary has been complicated by reason of the fact that no two of her steel plates are exactly the same, according to reports from the shipyard at Clydebank. Most of the plates are curved, and many of them are more than 36 feet long, 6 feet wide and more than an inch thick. Few are really flat.

The joining of the plate so that each rivet hole pairs exactly with the corresponding hole is an intricate problem, and more than 10,000,000 rivet pairs of holes must be made. Each plate must overlap at least six others adjoining it, creating a problem of arrangement that has required the study of a large engineering staff.

A large half-model of the ship has been laid out on a loft floor at the shipyard, furnishing an accurate picture of the successive rows of plates and a laboratory for the study of the details of construction which are carried out on a larger scale on the ship itself.—New York Times.

Greatest Russian Scientist

Has Done Much To Extend Study Of Nervous System

Both Tsarist and Bolshevik Governments have delighted to honor the great Russian scientist, Prof. Ivan Pavlov, says the News of the World. No one living has done more to extend the study of the nervous system of men and animals, and particularly knowledge of the connection between brain and digestion. He was awarded the Nobel Prize for this work as long ago as 1904. Last year, when he was 85, the Soviet Government spent £10,000 on equipping a laboratory for him. It now pays the old man, who was the son of a poor village priest, £2,000 a year, and according to H. G. Wells; he is the only man who dare answer Stalin back.

Bird Was Artistic

At Egginton Rectory, Derbyshire, a small stream flows through the garden; on the bank among the reeds and irises a moorhen built her nest; morning after morning the edge of this was carefully decorated with sprays of buttercups gathered from the adjoining meadow.

To help teach children music a resident of Portland, Ore., has invented a metal plate painted with a sheet to which magnet backed paper notes can be fastened.

Huge Cliff Demolished

Blasting In Scotland Destroyed Million Tons Of Granite

One of the greatest blasting operations in Scotland was successful recently when a granite cliff 500 feet high and stretching 400 feet across the face of Ben Dhurich, near Bonawe, was "demolished" by gunpowder. A signal was flagged from a tiny island in Loch Elvie. At this a man crouching on the mainland under a protective rock ledge in a forest 500 yards away, pushed down the lever of a dynamo, and the cliff tumbled into a myriad fragments. Powder fumes and granite dust rose in a cloud 2,000 feet high. In that second there was crowning triumph for men who had planned for the last four years to destroy the cliff, and by the touch of a lever there had been gained for industry 1,000,000 tons of granite. The success of the blasting, which cost \$20,000 to carry out, means that 400 quarries will be given work for six years.

Dropped From The Sky

Massed Landing Of Troops Practiced In Military Manoeuvres

Soviet military strategists dropped an army from the sky recently as they practiced their latest war manoeuvres—mass landing of fully-equipped troops with parachutes. Bearing rifles and sub-machine guns, the jumpers landed behind "enemy" lines, formed ranks quickly and bore down upon an opposing airborne.

Whole regiments, landing from the skies, succeeded in capturing the airborne, but later came to theoretical grief. When they used the airborne as a base from which to advance overland to attack the main "enemy" forces from the rear, they were met by a quickly mobilized defence force which, with the aid of tanks and armored trains, "annihilated" them.

FASHION FANCIES

LITTLE DAUGHTER FOLLOWS "SUIT" BECAUSE MUMMY HAS DECIDED IT'S A SUIT SEASON

By Ellen Worth

Here she is showing just how attractive and practical her new model can be. Originally it was carried out in light hought woven in red and brown mixture. The body jacket was plain brown wool. The jacket has enough warmth for fall days. And another nice thing about it is that it gives extra warmth for winter days.

Wool jersey dress with the jacket of velveteen is another attractive scheme.

Girls No. 975 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 2 1/2 yards of 39-inch material with 1 yard of 5 1/2-inch ribbon for dress and 1 1/2 yards of 39-inch material for jacket.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Let the new Fall and Winter Fashion Magazine assist you in assembling your family's fall clothes. There are designs for every type and every occasion. And of course one of our perfect-fitting patterns is obtainable for every design illustrated. Don't delay! Send for your copy to-day!

Now's the Day and Now's the Hour

With times improving, roll, your owners "who have smoked Ogden's Fine Cut in the past are crowding back to Ogden's because of the satisfying cigarettes it assures. And they are learning again that the best really costs very little. "Now's the day and now's the hour" for you, too, to get back to this favourite cigarette tobacco. And remember—"Chancteler" or "Vogue" are mighty fine papers.

52 Poker Hands, any number, now accepted as a complete set.

OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Plug

Land Has Disappeared

No Trace Can Be Found Of Property In Esquimaux

H. Sells of San Francisco was surprised recently to find a lot on which he had been paying taxes for over 50 years had disappeared.

Seller went to Victoria, B.C., to secure a title of a piece of property in Esquimaux, left to him by his father. He visited the land registry office and real estate operators both there and in Esquimaux, but could find no trace of the property.

His father came to the coast about 60 years ago, and, becoming interested in Victoria real estate, purchased the land which he left to his son in his death. The son was advised to hold the property as a drydock was to be built at Esquimaux which would increase its value. He let the land go at a tax sale and bought it back again.

The only explanation he can give now is that the property must be under water. It is said the matter was settled by the payment by the municipality of the amount paid for the land by Sellers at the tax sale.

10c WHY PAY MORE Best of all fly killers. Clean, quick, easy. Ask your Drug-gist, Grocer or General Store. THE WILSON FLY PAD CO., HAMILTON, ONT.

Great Progress Made In Agricultural Development In The Prairie Provinces

Great progress in agricultural development has been witnessed in the Prairie Provinces of Canada during the last 35 years. During the years 1901 to 1931 the area of occupied farm land in the prairie region increased from 15 million acres to 110 million acres, or more than seven-fold. In 1901 the Prairie Provinces contained 24.3 per cent. of the total occupied farm acreage in the Dominion and by 1931 this acreage had increased to 67.3 per cent. of the total. In the same period the improved farm acreage increased from 18.5 per cent. to 69.8 per cent. and the field crop acreage from 18.2 per cent. to 69.1 per cent. The decade 1901 to 1911 witnessed the greatest expansion, due to the rush of homesteaders into Saskatchewan and Alberta. Occupied farm land increased from 15 million acres to over 57 million acres. Of the improved land in the Prairie Provinces in 1931, 67 per cent. was in field crop.

Farming in the Prairie Provinces comprises four more-or-less distinct types—wheat growing, mixed farming, dairying (usually associated with mixed farming), and ranching. Wheat growing predominates in southwestern and central Alberta, throughout the whole of Saskatchewan except the northern and eastern fringe and the dry belt, and in southern Manitoba, although in the latter area, the proportion of other cereals and forage crops is growing rapidly. Mixed farming is found in northern and western Alberta and in the northern and eastern parts of both Saskatchewan and Manitoba—in other words over practically the whole of the park belt. Mixed farming is also the dominant type in the fringed districts. The greatest development in dairying has occurred in eastern Manitoba, northern Saskatchewan, and northwestern Alberta. Ranching is practically confined to the dry area in southwestern Saskatchewan and southeastern Alberta and to a strip of land extending from the international boundary northward along the foothills to beyond Calgary.

The Press Predominates

News Released Over Radio Only Given In Briefest Form

Winged-words carried on the current of electrical impulses and destined for the ear of the world flash out from Daventry, England, from Radio City, New York, or from a local radio station, giving to the "news of the world."

News of the world, but strangely enough, ought but a question-provoking what, when, and where is radio permitted to release to the listener-in. Every newscast given voice over the air is released in briefest form by news-gathering agencies with contact maintained with remotest reaches of the world as well as with the great metropolitan centres. Radio, in respect to news would be particulate save for the courtesy of the press. Powerless to capitalize on any news presentation and without the press world-wide contact with the very pulsebeat of the world, radio could but parrot the news of yesterday. Punctuating every statement made by radio with regard to news is a question—a puzzling lack of the definite. Turn then to your newspaper, truly giving to you the news of the world—Fort Erie Times-Review.

Watch Keeps Good Time

Present Owner Claims It Is 253 Years Old

An ancient watch is owned by Mr. Clement Toovey, a 79-year-old baker of Whielden Street, Amersham. He uses a watch that is 253 years old. It is believed to be the only one of its kind in the world. It is sold of gold, and is only slightly larger in circumference than a half-crown. The watch originally belonged to his great-great-grandfather, and has been handed down from generation to generation of the family to the other. Mr. Toovey has used it regularly for 45 years, during which time he has only spent 2d on it when a hand worked loose.

Peace For Sleepers

Movement To Be Away With Noise From Farms

Sleepers are getting some "breaks." For the movement to hush auto horns is spreading on a world-wide basis. Rome, Paris, Berlin, London, Florence, Naples are among European cities that have taken steps to dampen the ardor of auto horn tooters. In Madrid a bull may blow at his heart's content, but so much as a "peep-peep" from a motorist may mean trouble.

New York is in the midst of an anti-noise drive. Chicago authorities swung into action under a new Illinois law which gives policemen the right to judge whether a motorist is making an undue disturbance. The Toronto board of control has prohibited auto horn honking between 11 p.m. and 7 a.m.

Ottawa civic officials countered Toronto's claim to be the first Canadian city warring on auto-honking law by digging into its archives and finding it had an edict to hush noisy motorists before there were any. City Clerk Norman Lett discovered a 45-year-old bylaw forbidding anyone at night to "blow any horn, foot and whistle, about in the public streets or otherwise make noise calculated to disturb inhabitants."

Had Many Defenders

Charm Of Garibaldi Made Him Hero Of Italy

Many are the stories told of the courage and charm of Garibaldi, Italy's hero. On one occasion, when the King was exerting every effort to have him captured, he left Italy, going across the border into France, sitting alone in an inn one night, he was recognized by one of the patrons, who informed his companions of his identity and also of the fact that there was a heavy price on his head. The men, more than a score in number, surrounded Garibaldi and announced their intention to return him to Italy. If they had expected Garibaldi to appeal to them for mercy they must have been disappointed. He gently requested that they sit down and partake of his hospitality before calling the soldiers. This they willingly did. Garibaldi began telling them of his cause, and of his adventures and escapades. Their interest soon turned to enthusiasm. They all devoted friendship. Meantime the landlord, fearing trouble in his inn, had sent for soldiers. When they arrived they found Garibaldi surrounded by defenders who repulsed the soldiers. His charm had won them over completely.

Cheap Amusement House

Penny Theatre Has Been Opened In Hamburg, Germany

A theatre has been opened at Hamburg in which every seat, including cloakroom and programme charges, costs a penny. It is called the "Hamburg Stage". In order to make this possible the manager, actors, stage hands, programme sellers and box office girls have collaborated in painting and arranging the scenery and making the costumes. Many unemployed actors are being given work at the theatre.

Dog Is Good Fisherman

Dives After Perch And Picks Out Best Ones

T. K. Jackson, of Fulford Harrow, B.C., is the owner of a remarkable dog, "Tip", a small black canine with a predominant strain of Labrador in him, started a fishing career about five years ago. Seeing some herring in shallow water he grabbed one of them. Seemingly to enjoy the sport he went back for more. Now "Tip" goes after perch and will swim out into deep water to dive for them. He takes only the palatable fish to his master.

For training airplanes pilots a captive machine mounted on frame-work carried by a special motor truck is in use at a Pennsylvania airport.

Wheat Testing

U.S. Test Of Thirteen Varieties Of Bread Made From Various Grades Of Wheat

United States Secretary of Agriculture Wallace invited reporters to become bread-tasters at his press conference in Washington.

He explained that agriculture department chemists had baked 13 loaves of bread from as many varieties of wheat, ranging in weight from 50 to 43 pounds per bushel, and in price from 65 cents to \$1.30. The object, Wallace said, was to determine the difference in taste in breads baked from different qualities of wheat.

You've noticed that I've picked some holes here and there," Wallace added, indicating bread slices on a table, but he asserted he could tell little differences between the loaves. Wallace said the trade was "talking about the millers importing 20,000,000 to 25,000,000 bushels of hard spring wheat from Canada" to meet demands for this quality. He asserted the United States has sufficient wheat, but that rust had caused a big loss in hard spring wheat which he said produces the finest quality of flour.

Makes Visitors Welcome

Lord Ritchie Is Popular Chairman Of Port Of London Authority

The Port of London Authority must be one of the busiest institutions in the world, not least in respect of its reception of visitors. This is largely due to the hospitality of its chairman, Lord Ritchie of Dundee, who never misses an opportunity to show right-welcome to the world that they are welcome. He has just completed one of his heaviest months, but his pleasure in entertaining visitors seems inexhaustible.

Newspaper Writer Makes Some Reflections Regarding Motor Speed Development

Fighting The Soil

Rehabilitating Farms Is One Of Dr. Archibald's Jobs

From his office in Ottawa Dr. E. S. Archibald is supervising the rehabilitation of western Canadian farms hit in the past few years by soil drifting and drought. It's a big task, but one which Dr. Archibald is capable of handling, for co-ordinating many enterprises is one of his specialties. When not busy rehabilitating farms he looks after the direction of the more than a score of experimental farms operated by the Dominion from coast to coast.

His additional work came about with the recent creation of a farm rehabilitation committee, and because of his knowledge and executive ability he was picked as chairman. Tree planting to form shelter belts for farms where the soil is so loose it blows away in wind storms, new method of farming which will allow the soil to stay put and not hinder the grain or livestock crop; the use of grasses to hold the soil together; and ways and means to keep water on farms in areas where it does not rain too frequently—these are some of the things which occupy Dr. Archibald's attention to-day.—Toronto Star Weekly.

A newly-married couple left the church on a motorcycle, the bride on the pillion. A cynical spectator remarked that this would probably be the last time she took a back seat.

Behind the astounding record of 301.537 miles an hour made over a measured mile by Sir Malcolm Campbell is a long experience in driving racing cars, superb courage and skill and 12 years of determination and scientific study. No more accident is his performance. Nor is the Bluebird quite the same creature at which we marvelled when she began to break records in 1927. She is an evolution. Engineers and physicists have refined her lines, increased her engine power, given her stabilizers and ballast to hold her down, provided her with motor-controlled brakes, equipped her with strange instruments and devices and thus made of her the most remarkable organism that ever ran on wheels. For all her six tons she is a frail thing. Let her run at five miles a minute for only 15 consecutive minutes and she would be completely paralyzed. So tender are her tires that they are useless after a trial run or two—chemically disintegrated by heat. At the 2,500 revolutions a minute that they were probably making, their centrifugal force was enough to keep them distended without any air—also enough to fling off their treads like so much mud had they been made of butter. Perhaps Sir Malcolm's miraculous escape from death when one of them blew out may be attributed partly to this mechanical good fortune, partly to his rare presence of mind.

Out of the racing car of yesterday came the fast stock car of to-day. Speeds of 60 and 70 miles an hour on the open road are now a commonplace—speeds at which we gasped when they were made on the track by daredevils only 30 years ago. What of to-morrow? Does the new record mean that we, too, shall some day flash across the landscape at 100 and possibly 200 miles an hour?

The record made in Utah speaks for itself on these points. First of all, it raises the question—"of the road." The faster the vehicle, the straighter and smoother must it be. Once the sands of Florida were regarded as nearly ideal. Now their pebbles and shells, not to mention their limited angle of vision, make it necessary to transfer trails at very high speed to the Bonneville Salt Flats of Utah. Is it likely that we shall have highways as mathematically straight as surveyors can make them for hundreds of miles and of a nature that would match that of a billiard table and of an unprecedented width?

And then the car itself. A huge tail to keep us on the ground, a wind gauge or two on which a watchful eye must be kept, a mass of levers on which we must sit lest we soar off like birds, tires even sturdier than those now made for racing, since they must run for days instead of minutes; engines of a power unheard of in cars produced in large quantities—pile up the conditions in the light of what Sir Malcolm teaches us and the prospect of howling along at speeds much higher than those that now seem irritatingly slow seems dubious indeed.—New York Times.

King George Suits Himself

Does Not Always Wear Kilt When Visiting Scotland

King George does not keep rigidly to the rule which King Edward enforced when the Court was in Scotland of wearing the Scottish dress whenever he left the Castle. The King wears the kilt of Royal Stuart tartan, on arrival at Balmoral, but generally wears knickerbockers and stockings. They are, in fact, his favorite dress. With them he wears a felt Homburg hat. The Princes emulate the King in this observance of dress. The Queen always wears a ribbon of tartan when abroad in Scotland.

Protest has been made by lovers of Dickens' novels against the destruction for road purposes of the cottage in Petersham, Surrey, where he wrote "David Copperfield."

The Society Islands of the South Seas now have a photograph record camera.

The SNAPSHOT GUILD

MEMORIES OF HOME

Pictures, such as this one, are not difficult to make so let your camera furnish you with "Memory Insurance."

Do you remember "way back when grandmother's "parlor" was furnished with the very latest "cane-back" furniture, the lovely round "cane table" with its marble top, the huge portraits with their deep, heavy gilded frames and the always present "what-not" with its assorted display of "bric-a-brac"? Wouldn't you like to have a picture of it to help recall fond memories of days gone by?

Believe it or not but it will not be long until you will be trying to picture in your mind some of the furniture and furnishings you had in your home when you were a child or perhaps when you were first married. Interior snapshots will serve as "memory insurance."

Don't put off taking these pictures any longer for making them is not at all difficult; in fact you will enjoy it. Here are a few pointers that may help you in making your first shots. If you take your interior pictures in the daytime the chances are that you will have to take a time exposure unless your camera is equipped with a very fast lens, lens f.2.8 or faster. If a time exposure is necessary you will have to use a tripod or else place the camera on some solid support, such as a table. Even with an f.3.5 lens you should have some substantial support for your camera. If you will probably find it necessary to take your shot at 1/16 or 1/32 of a second it is extremely difficult to hold the camera steady. Any movement of the camera will cause a blurred picture.

The secret of success in indoor pictures lies in controlling the light reaching the various parts of the

room to be pictured. To begin with never point your camera directly at the window or door through which the greatest amount of light is coming. Keep the light behind or to the side of the camera. If, as sometimes happens, a sunny window is in a particular part of the house you want to take, you can eliminate glare by a very simple trick. Pull the shade of that particular window clear down and keep it down for an exposure long enough to give you the other features and details. Then, close the shutter and run the shade up to its normal position. Now, go back to the camera and, without changing the film or the camera's position, open the shutter again for a half second longer.

It's a good idea to use a very small lens stop in taking indoor pictures because you want detail. Focus on a point about half-way between the camera and the far side of the room, then, when the lens is stopped down you will find that practically everything is in sharp focus.

Avoid including large pieces of furniture in the foreground, lest they take up more space in the picture than they deserve. Exposure time will vary, of course, with the brilliance of the daylight and the degree to which the walls reflect light. On a bright day, colored room can be taken with an exposure of five or ten seconds. On dull days, in dark rooms having only one window, you will need as much as five minutes, with the lens at f.16.

"Memory Insurance" costs but a little, so let your camera take interior pictures that in later years will be worth a lot.

JOHN VAN GUILDER

WORLD HAPPENINGS
BRIEFLY TOLD

For the first time in the history of the Bombay high court, a microphone and amplifier has been put in use in one of the chambers.

Field Marshal Lord Allenby, who celebrated his 74th birthday on St. George's Day, April 23, has an aviator's stock with many varieties of foreign finches.

A woman who cashed a cheque in an Edmonton bank wasn't taking any chances. The cheque read: "Pay to Mrs. —, 15 'Canadian dollars'." She got them.

Father John Louis Stacey, 38, died at the wheel of his car in Edmonton as he drove to a city hospital to get treatment for a heart ailment. The car crashed into another parked machine.

Indicative of the rapid mechanization of the Royal Canadian Mounted Police, not one saddle horse is stabled in the force's barracks at MacLeod, Alta. All animals formerly kept at southern Alberta detachments have been disposed of.

A few weeks ago Joseph Eckert, 15, collided with a buggy while riding his bicycle in Stratford, Ont. The shaft of the buggy went clear through the boy's body, an inch below the heart. Now he is up and around again almost as well as ever.

Two men were sentenced to five years' imprisonment for firing shots at a procession of Orangemen on the streets of Belfast, July 12. They were Thomas Connolly and Joseph McDonald. Several persons were killed and wounded in the July riots.

Vancouver is returning to a normal financial position "better than any other city in Canada," Ald. C. E. Tisdal, chairman of the civic finance committee, told the Retail Credit Grantors' Association in session in that city.

Cane Sugar Growers Worried
Afraid Best Cultivation In United Kingdom Will Run Industry

With the United Kingdom Government subsidizing beet sugar at home, the British West Indies and British Guiana are wondering what is to become of their cane sugar industries—already depressed by low prices.

Barbados, whose only possible crop for commercial purposes is cane, is particularly anxious to ascertain how far the Imperial Government intends to go with the cultivation of beets for sugar.

This island of 100,270 acres has 100,000 acres under cultivation, and of a population of 180,000 about 120,000 colored people look to the sugar cane plantations for employment.

Nearly all the planters are now in debt to the banks and are growing cane only in the hope of better times, and in order to support the enormous working population.

Should they be obliged to abandon sugar, the island would be penniless, it is said. There would be no question of debt, because all the colony's taxes come from the planters, and with their ruin the chief source of revenue would be shut off.

Some of the other islands with different vegetation have a better outlook. Grenada, for example, is making up for sugar losses by devoting much land to cultivation of other crops, and has been successful this year with bananas grown under a supply contract for a Canadian company.

Jasper-Edmonton Highway

Believe Arrangements Made To Ensure Construction

Climaxing a 15-year fight, construction of a fully-standard, all-weather highway from Edmonton to Jasper appears assured at last, according to an announcement by acting Premier Manning for taking over the abandoned railway grade section of the highway had been completed and sufficient funds secured to guarantee the necessary construction, which will consist mainly of widening the grade.

Older than Rome's famous roads, was a road built by Assyrian King Sargon the Second to link Nineveh with another town.

AT HISTORIC CAIRN

—Canadian Pacific Photo.

Sir Edward Beatty, G.B.E., chairman and president of the Canadian Pacific Railway, is shown here with little Joyce Austin, daughter of W. T. Austin, section foreman at Craigellachie, B.C., following Sir Edward's recent visit to the Craigellachie cairn which marks the spot where Lord Strathcona, on November 7, 1885, drove the last spike completing the Canadian Pacific Railway from ocean to ocean. On behalf of Craigellachie's handful of citizens Miss Austin presented the C.P.R. president with a bouquet of home grown flowers, a tribute which Sir Edward acknowledged with hearty handshake. Sir Edward visited the memorial cairn in the 50th anniversary year of C.P.R. history as it will be 50 years on November 7 since Lord Strathcona drove the momentous spike.

Value Of Grain Crop

Western Crop Estimated Value Placed At \$241,381,000

Western Canada's grain this year will be worth more than at any time since 1931, according to an estimate by the Winnipeg Free Press.

Based on present prices, says the estimate, the total 1935 grain crop will bring \$241,381,000. The paper using its own 274,600-bushel estimate, says wheat will be worth \$156,615,000 at the Fort William figure of 74 cents a bushel (price for average minimum grade) less 17 cents average haul.

Thus, says the paper, the total 1935 crop is \$22,186,000 more valuable than the 1931 crop, \$159,195,000; \$22,857,000 more valuable than 1932, \$158,524,000; \$71,388,000 more valuable than 1933, \$170,043,000; \$18,326,000 more valuable than 1934 \$223,055,000.

Many Chinese in Shanghai carry their pet canaries about with them and organize singing contests between the birds.

Approximately 11,900,000 words are spoken annually by the average man.

Stratosphere Flights

Famous Flyer Says This Method Is Not Practical

Col. Roscoe Turner, America's dashing cavalier of the air who has formed the habit of roaring across the continent in a few minutes over 10 hours, on a visit to Toronto, said stratosphere flying was a "practical impossibility."

"When you get up in the thin air, have to supercharge your motors and make the cabins air-tight, the cost becomes prohibitive," Turner said. "The world will never see commercial flying in the stratosphere. A medium will be established half way between the stratosphere and the present air lanes where commercial planes can operate most economically."

Monument To Horse

A horse's monument erected to the "Unknown War Horse" has been unveiled in the courtyard of the Francis Joseph Cavalry Barracks in Budapest, Hungary. The monument was erected on the initiative of General Stephen Horthy. After the unveiling ceremony the horses of the Regiment of Hussars quartered in the barracks filed past the statue, led by their riders.

Household Arts

PATTERN 5255

Soft, cuddly animal toys are the favorites of nursery-age youngsters and wise is the mother who realizes how easily and cheaply such toys can be made. No need to buy new material for time; the left-over scraps of calico, chintz or other novelty cottons are adequate and so colorful. With only two simple pieces required for each toy, not counting the ears and elephant's tusk which are separate, the stitching and stuffing are completed in no time at all. Then watch the merriest when you bring out long-eared Peter Rabbit, the terrier that's smart as a whip, and the elephant "just like we saw at the circus!"

In pattern 5255 you will find a transfer pattern for the animals shown; directions for making them and material requirements. To obtain this pattern send 30 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 176 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

SUNDAY SCHOOL LESSON
SEPTEMBER 29

JOHN
(The Minister And His People)

Golden text: Beloved, imitate not that which is evil, but that which is good. He that doeth good is of God; he that doeth evil hath not seen God. III John 11.

Lesson: III John.

Devotional Reading: I John 4:7-21.

Explanations And Comments

Salutation, verse 1. John, the writer of this epistle, calls himself "the elder," a title which may have been an official one, indicating dignity and authority, or it may be a reference to his age. Galus was a common name among the Romans. Galus the beloved, to whom John writes this personal letter, may have been an elder or a pastor. "Whom I love in truth," writes John. "The truth, as it is used in this epistle, has almost a technical meaning, implying not only the eternal principle, but also the organization which embodies it—the Church" (Dummelow). Commendations, verses 2-8. John wishes that the well-being and health of Galus may correspond to his spiritual well-being. He rejoiced greatly when messengers came to him from the church to which Galus belonged and brought word that Galus was conducting himself worthily. I was overjoyed when some brothers arrived and testified to the truth of your life, as indeed you do missionaries would not accept upbraid. "The itinerant brethren were always at work, going out from Ephesus to the various churches and returning with their reports" (David Smith). No greater joy could come to him, John declared, than to learn that his children were walking in the truth.

Beloved, wrote John, that is a fine work you do when you aid (set forward)—with money, food, lodging, etc.—strangers; they have testified to your love before the church. Public sins had little to commend them; moreover, travelling Christians were usually poor, and the giving of hospitality to them was an important part of the work in the early church. Pray them that in their journey worthy of God; they have started out on their safe and declined to take anything from pagans; hence we are bound to support such men. To prove themselves allies of the Truth (Moffatt's translation). The lead the true life (Moffatt's translation). No greater joy could come to him, John declared, than to learn that his children were walking in the truth.

These Frogs Are Different

Species Shown In New York Ship Tadpole Stage

Three young frogs no larger than houseflies, hatched in the biology laboratories of the American Museum of Natural History, New York, were on exhibition along with several hundred other amphibians, reptiles and fish at the annual show of the Aquarium Society.

Visitors rubbed their eyes when the three frogs, known scientifically as a eutherodactylus johnsoni, hopped onto a dime, leaving room for six or eight more.

"Dr. G. Kingsley Noble, curator of the museum's department of experimental biology, explained smallness as not their only unusual characteristic. They were one of the few species of frogs, he said, which had no tadpole stage, the young being ready for business as soon as they popped out of the egg."

It developed some time back in their dim past, they had a tadpole stage but eventually found themselves in a pretty pickle with hardly enough water handy for a tadpole to swim in. Apparently resourceful amphibians, they just eliminated the tadpole stage and started laying their eggs on land. Dr. Noble said it probably took a good many thousand years but they did it.

New Place To Go

Stratosphere May Be Popular Holiday-Resort Someday

"It is almost safe to prophesy that our children's children will spend their honeymoons in the stratosphere or their summer holidays in the ozoneosphere." This was declared by Colonel E. B. Mackintosh, director of the South Kensington (England) Science Museum while receiving the gondola of the balloon in which Professor Piccard made his second historic ascent into the stratosphere. The balloon, which has been presented to the museum, left Dubendorf, Aerodrome, near Zurich, and after a flight of 12 hours landed on Lake Garda. The maximum height reached was about ten and a half miles.

Africa's Oldest Empire

History Of Abyssinia Ranges Over 4,500 Years

Harold J. Shepton, F.R.G.S., wrote the following article for the Edinburgh Scotsman:

Whatever may be the fate of Abyssinia as a result of the present dispute between this age-old African Empire and Italy, some reference to this remarkable land, her history, the strange mentality of her people, and their quaint customs and ways may prove of timely interest.

Her history is an ancient story of fact, legend, and tradition, ranging over thousands of years. On one occasion her present ruler, Empress Haile Selassie, prepared for a friend of mine a list of her rulers. It contained the names of 312 sovereigns and extended back over 6,300 years, to 4,530 B.C., or the 97th year of the creation of the world, according to Abyssinian computation. Included in this list were Solomon and the Queen of Sheba, from whose son, Menelik, the ruling house claim direct descent, which would give them a pedigree of the somewhat unusual length of 3,000 years.

Despite her long history Abyssinia, shut off from the rest of the world by towering mountains and barren deserts—"the world forgetting, by the world forgot"—her people have maintained an inviolability almost Tibetan in its character. As a result the mentality of her people and the condition of most of the country have remained virtually unaltered, by the passage of centuries. They live like savages as they did two thousand years ago.

True, Addis Ababa, the capital is now connected with the outside world by a railway—a single line which connects it with Djibouti, the port of French Somaliland. This is the only means of communication in a country about twice the size of Germany, or some 350,000 square miles in extent. The trains only run by day, out of respect to the provisions of the Danakil tribes, who commandeer the rails for speakeas and the copper telegraph wire for bangles. In the wet season, moreover, travellers often spend three or four days covering the 500 miles between Djibouti and the capital owing to the permanent way being washed out by heavy rains.

The people still wear the old dress which seems to have been theirs since time immemorial. This consists of a cotton shirt, trousers, and the channa, the latter being a kind of cotton scarf worn like a toga during the day and used at night for a bed covering. The costume is the same for men and women and for all shades of the Danakil tribes, who the channa is indicative of the attitude of the wearer towards the person in whose presence he may be. Thus to draw it across the face would imply contempt, whilst to drop it off the shoulders and gather it round the waist is the highest form of respect.

Impromptu courts of law, where any passer-by may be called upon to act as a judge, are still held at every street corner, and any trivial dispute is settled with much impassioned oratory and an appalling waste of time. Rough-and-ready justice, according to the Mosiac code, holds the field for more serious crimes. Until recently it was quite a common sight to see half a dozen men swinging in the market place from improvised gallows or trees. Now murderers are executed in a little hut in the town, wherein they are tied to a post, rifles are trained on them through tubes in the wall, and the triggers are pulled by the relatives of the murdered man.

Very few Abyssinians outside the priesthood and the officials of Addis Ababa are able to read or write. The people as a whole are quite illiterate, and letters are not signed but sealed. The Emperor alone is entitled to place his seal at the top of his letters; everyone else's appears below the writing. It is a graceful script and a picturesque language; but, as there are 20 letters in the alphabet, based about twenty compounds of these, Amharic is not exactly a subject that can be acquired in a week-end.

The possessions of France consist mainly of small islands in the Atlantic, Pacific and Indian oceans, with continental territories in Africa, South America and Asia.

BRITISH ELECTIONS MAY BE DEFERRED UNTIL NEXT YEAR

London.—The Ethiopian crisis, it was reliably learned, has caused the National government to drop any idea of a general election before next spring, when it was generally expected to be held in any event.

Previously it had been considered that Prime Minister Baldwin would refer to the election when he addresses the annual convention of the Conservative party opening Oct. 4. Now it is believed the prime minister will have even more momentous matters to discuss in his first statement of policy since the situation abroad became critical.

The convention, too, contrary to usual policy, is expected to divert itself largely from internal politics and concern itself mainly with the country's position in regard to defence, which has long been agitating Conservatives.

The Labor party, however, proposes itself to be taking no chances over a sudden election. They have already endorsed 510 candidates, leaving only 105 seats uncovered of which even Labor regards 50 as hopeless from their viewpoint.

Ethiopia Takes Precautions

Emperor Orders Storing Of Food Supplies For Use Of Troops

Addis Ababa.—Emperor Haile Selassie ordered precautions taken to prevent Ethiopia from starving in the event of war.

For the first time in the history of the ancient empire the government made preparations to feed troops and civilians under a systematic organization of food supplies. These supplies are claimed already sufficient to maintain the army and the population for a year's campaign.

Hitherto armies in the field lived on towns and villages, devastating crops and leaving upon householder, causing famine. Foreseeing the possibility a conflict might last longer than one year, authorities purchased large supplies of corn, barley and tef, a native grain.

These supplies are being stored in subterranean depots in all provincial centres. There they are easily accessible to the army and the populace.

The public was ordered to grind cereal and hoard most of it for its own use, selling the residue to the government for a fixed rate.

The Ethiopian soldier is said to be the easiest in the world to feed. He can live and fight on a handful of grain every 24 hours which he roasts on a primitive, convex iron sheet.

Ethiopia is self-contained so far as food is concerned, authorities said, and no Italian blockade could affect it.

Atheism In Schools

Makes Charge That Communism Taught In Ontario Schools

Calgary.—The charge that atheism and Communism were being taught to children in Ontario schools was made here by R. A. Hiltz, of Toronto, general secretary of the general board of religious education, in his report to delegates at the annual meeting of the executive council of the general synod of the Church of England in Canada.

In his report on religious education in public schools, Mr. Hiltz called attention "to a report made recently by a school inspector in Ontario in which he stated definitely that atheism and Communism were being taught to the children in at least one of the schools in his inspection."

"Sufficient evidence is available," Mr. Hiltz said the inspector reported, "to show that a Communist organization has set up a Young Pioneer Club in this school."

"Through this club the children are taught that there is no God and that the Bible is false. They are also taught that neither loyalty nor respect is due British institutions."

For Suppression Of Narcotics Geneva.—British League of Nations recently Canada pressed for more vigorous efforts at the suppression of the traffic in narcotic drugs.

Women Entering Contest

Twelve Have Already Been Nominated For Federal Campaign

Toronto.—With choice of candidates in the forthcoming Dominion general election still not completed, there are nearly as many women in the contest already as in the last four elections. Twelve women had been nominated to Sept. 18. The number is one less than the total in the elections of 1921, 1925, 1926 and 1930. It is more than double the 1930 list of women.

Women have been chosen so far in the Yukon and the provinces of British Columbia, Alberta, Saskatchewan, Ontario and New Brunswick. Ontario leads with six. Alberta, British Columbia and New Brunswick have one apiece. There are two candidates in Saskatchewan and Mrs. George Black, wife of the former speaker of the House of Commons, is Conservative candidate in the Yukon, a single-member constituency.

Except for Mrs. Black and Miss Macphail the women nominees represent either the C.C.F., which has named six, or the Reconstructionist party, whose nominations already include four women candidates.

Churchill Port Busy

Loaded With Wheat Leopold Starts On Second Trip

Churchill, Man.—A full cargo of the West's best wheat, 325,000 bushels, was poured down the chutes into the spacious holds of the ocean steamer Leopold for her second sailing for the 1935 season from Manitoba's northern seaport.

Twenty-four days after sailing from Churchill on her first trip, Leopold docked here Sept. 17th and sailed on the 19th. Antwerp again her destination.

Here wheat movements from Churchill are expected shortly. Vessels raced towards port to load the grain. The Pengreep, Wentworth, Charles and Alma Dawson were due to arrive before the end of the month. It will be the Wentworth's second trip this year.

The first new-crop grain was delivered to the elevator here Sept. 16th and graded No. 1 Northern.

Prince Under Treatment

Recurrence Of Old Ear Trouble Not Considered Serious

Vienna.—The Prince of Wales is receiving treatment here for an old ear trouble, with which he was troubled two years ago.

When the trouble recurred, the prince consulted a famous specialist, Heinrich Neumann, who diagnosed it as an inflammation of the middle ear. It is neither dangerous nor painful, but the prince must pay further visits to Professor Neumann and it is hoped the ailment will respond to treatment.

His Royal Highness is holidaying on the continent. He arrived here from Geneva.

Makes Formal Denial

Premier Forbes Says New Zealand Will Not Adopt Social Credit

Wellington, N.Z.—Formal denial was issued by Prime Minister G. W. Forbes of reports recently to the effect a race is in progress between the province of Alberta and New Zealand to "see which is first to adopt the Douglas credit system."

The Douglas credit theory, said the prime minister, is supported by only a very small number in New Zealand, "whose people are much too sensible to be carried away by such theories—theories that have been repudiated by all economists of repute throughout the world."

New Mercantile Flag

All German Merchant Vessels Ordered To Fly Swastika

Berlin.—The order has gone out to fly the swastika from all German merchant ships, beginning at once. The order follows enactment of a new law making the swastika the German mercantile flag. At Hamburg, the officers and crew of the flag-ship "Hamburg" of the Hamburg-American line, ceremoniously raised the new flag on their vessel, solemnly swearing "loyalty until death" to the Nazi emblem.

BACKS SANCTIONS

When Maxim Litvinov, Soviet Foreign Minister, spoke before the League of Nations Council at Geneva in favor of sanctions in the Italo-Ethiopian crisis he created a sensation. Britain already has intimated her intention to back sanctions.

Refugees Are Destitute

Nearly Million In World Whose Fate Is Tragic

Geneva.—There are still nearly 1,000,000 refugees in the world—not counting thousands in North and South America and certain European countries, concerning whom no definite statistics are available.

Their fate, the political committee of the League of Nations assembly was told by Chairman Rudolph Kunsiljerski of Czechoslovakia, is tragic. Twenty thousand in the neighborhood of Harbin in Manchuria alone are said to be in a state of almost complete destitution.

Reaping Second Crop

High River Farmers Find Grain Revived After Hail

Lethbridge, Alta.—Some farmers are viewing their neighbors' grain fields with envious eyes. Hailed out, they plowed up their fields. Neighbors did not follow suit, and in the High River district many are reaping a second crop from fields that were battered into the ground with a 100 per cent. loss in July. Yields of from 10 to 15 bushels an acre are expected from the second crop fields.

IL DUCE'S SONS LEAVE FOR AFRICA

Embarking on the motor ship "Saturnia" bound for East African service, Benito and Vittorio, sons of Mussolini, can be seen in the white uniforms as pilot officers in the Italian Air Force, with other military celebrities. With them are General Ferrusi (behind), Signor Starace (centre), and Count Ciano, their brother-in-law (in front).

Bad Storm In England

Seven Persons Dead And Widespread Damage Is Reported

London.—Great Britain's worst September storm in three-quarters of a century, finally blew itself out, leaving seven persons dead, many injured and widespread material damage.

The south coast of England became a graveyard for score of small yachts. Brighton alone reports damage of more than \$15,000 and Bournemouth, where not a single beach hut was left standing, a similar sum.

Six thousand men from the post office repair staff worked in relays to unravel a tangle of telephone wires in southern counties, where more than 19,000 lines were out of order. Others struggled to remove fallen trees which blocked many roads.

The British steamer Mary Kingsley succeeded in making port at Falmouth after being washed by mountainous seas which dislodged a 40-ton locomotive from its position on the forward deck.

Three members of the crew, injured while trying to drain a 38-ton barge which had become filled with water, were removed to a hospital.

May Choose Edinburgh

Wedding Of King's Son In St. Giles Cathedral Being Considered

London.—A report the king's third son, the Duke of Gloucester, and his fiancée, Lady Alice Montagu-Douglas-Scott would be married in Westminster Abbey, appeared in the Manchester Guardian. Informed circles took this with reserve. It is understood the king and queen and the bride's parents are considering the propriety of a wedding in St. Giles' cathedral at Edinburgh. The bride's family—the Duke and Duchess of Buccleuch and Queensberry—being so prominent in Scottish life.

In any event the ceremony is expected to take place before Christmas.

Set Price For 1934 Wheat

Will Receive Same Price As For New Crop

Winnipeg.—Farmers still holding wheat grown in 1934 will receive the same price for it from the Canadian wheat board as for the 1935 crop it was announced here.

This means a price of 87½¢ a bushel for all No. 1 Northern wheat. Fort William basis, whether it is in store in elevators or held on farms, as long as it is owned by the producers. The date on which the board will be purchasing is to be announced shortly.

ITALY IS TAKING STEPS TO RAISE FUNDS FOR WAR

Rome.—The Italian government indicated its probable rejection of a League of Nations compromise with Ethiopia, reorganized its tax program to provide for war, and shifted thousands of troops into Libya because of a threatening attitude on the part of tribesmen.

Premier Mussolini presided in person over a cabinet meeting which passed sweeping provisions "designed in part to furnish means for facing the expense necessary for the defence of East African colonies." A great national loan was approved.

Assignment of troops to Libya, Italy's north African colony which is governed by Gen. Italo Balbo, resulted from what was described as a concentration of armed Senussite tribesmen on the frontier of Egypt and Libya.

The cabinet approved the issuance of a national loan which is to be written "in the great book of public debts."

The holders of government 3½ per cent. bonds which now are quoted below 70 may exchange them for the new bonds at 80.

The cabinet declares: "These sacrifices, which were too heavy in the conditions in which the national economy found itself a year ago, can be demanded in the present condition of diminished unemployment, the boom in industrial and commercial activity, and of the better situation in agriculture through the abundance of crops and the higher level of prices."

In financial circles it was stated the war loan would run to many billions of lire. (The lire is worth about eight cents.)

The cabinet authorized the expenditure of 337,000,000 lire by the navy for the construction and filling of oil reservoirs for the navy, in still another effort to make Italy self-sufficient.

Chinese Gang Arrested

Leaders Confess Victims Killed Before Ransom Was Demanded

Tientsin, China.—The arrest of a gang of 20 Chinese on kidnapping charges led to disclosures of cruelty authorities said had seldom been equalled in the annals of crime. Bodies of 20 supposed victims were found beneath floors of houses in various parts of the city.

Leaders of the gang confessed, police said, that they had immediately strangled the victims after they were kidnapped. Ransoms were then demanded but the bodies were never returned.

Initiated By Indians

Were First To Introduce Social Credit In Alberta

Toronto.—Blackfoot Indians in Alberta had Social Credit long before the regime of Premier Aberhart, they told Kenneth Kidd of the anthropological department of the Royal Ontario museum, who spent the summer on their 138,000-acre reserve near Calgary.

"They said they used the same principle when they divided buffalo meat among the tribe after a hunt," Mr. Kidd said on his return to Toronto.

New Medical Association

Edmonton.—Delegates to the annual convention of Alberta Medical Association voted their organization out of being, to become part of a national association. The new organization will be known as the Canadian Medical Association, Alberta division. Dr. D. S. MacNah, Calgary, became first president of the new association.

Big Road Building Program

Winnipeg.—Immediate start on a \$2,750,000 road and bridge building program was authorized by the Manitoba government. An agreement with the Dominion government, paying part of the cost, provides men must be at work on the projects prior to Oct. 30, otherwise the work cannot be started.

The new 1934

GOOD YEAR
PATHFINDER

Canada's
Biggest Value!

SOCIAL CREDIT IS ENDORSED BY KING.

In the first speech delivered in his own constituency of Prince Albert, on Saturday last, Rt. Hon. W. L. Mackenzie King said, in part, "Social credit will spread like wildfire over the whole of Canada and over the whole world—if Premier Aberhart can make his scheme work in Alberta. There is no need of a social credit party in Federa-

Rt. Hon. W. L. Mackenzie King.

ral politics. for it the Alberta experiment is a success every political party in Canada, would speedily adopt the new doctrines." In the meantime the best course was "to give the new Alberta Government every opportunity to test out its plan and to avoid complicating Federal issues by electing social credit candidates who could never form a government at Ottawa.

A Limit to Debts?

A recent double tragedy reported in the daily papers originated in the attempt of a police officer to serve a summons on a farmer. The suggestion is made the farmer was worried to distraction by an accumulation of debt he saw no way of paying. There is a hint in this incident that some legal limit ought to be set to the amount of debt a person may incur in relation to his assets.

Personal liberty is a priceless thing, and it may sound harsh to say one man may not give, and another accept as much credit as they may agree upon. But the depression years have shown that if a man gets too far in debt that it ceases to be his own exclusive business, and becomes very much a matter of public concern.

Prevention is easier and cheaper than cure, and nobody would be wronged if the law set a dead line beyond which no one could go in taking on obligations. The high pressure salesman would object of course, but it is time to do something to cramp the style of that too-enterprising inflator of credit.

LEADING PAINT MANUFACTURERS ANNOUNCE

PRICE REDUCTION

First Quality House Paint

Now

\$3.95

per gallon

(Whites Slightly Higher)

The Quality Remains Exactly The Same. Only The Price Is Changed.

Dating from to-day, the price of first quality house paints manufactured and sold by the undersigned companies is reduced to \$3.95 per gallon.

There has been no change in market conditions or manufacturing costs to justify this step. We feel, however, there is urgent need for action that will make it possible for house-holders to obtain the highest quality paints at the lowest price consistent with strict maintenance of quality.

Thousands of people all over the country have been forced to put off much needed painting. Thousands more have been misled by "bargain" prices into using inferior paint of little or no value. We want to make it easier for you to enjoy the advantages of painting with first quality paint only, and are confident that the generous reduction in price now announced is the best way to accomplish this.

THIS IS OUR CONTRIBUTION TOWARDS NATIONAL RECOVERY

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all his land, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of the hill in order to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to lend her.

Nancy and Matthew Adam go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy is amazed to see the Columbine residence all lit up, and asks Matthew if he knows why. He said: Let's go in and see. Then Nancy learns that she is to have a room, and in a different setting than had been planned for her in Boston.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the room look presentable.

Jack Nelson, Matthew Adam, and Nancy go to the prairie home of Matthew's uncle for the night, and after Nancy and Jack leave for home, they are caught in a blizzard.

New Go On With The Story

CHAPTER XVII

The ride to Prairie Ranch had been a jolly one, and a new experience to the young Nelsons. "Uncle Tom and Aunt Emily" welcomed them warmly, and even suggested that "if one day or two, so Mark would be able to accompany them home; but Jack demurred.

"With both Matt and Mark away, Mr. Adam needs me," he explained.

"I'll Tell Anybody Gin Pills are Good"

—writes a Lunenburg, N.S., man who had suffered from Rheumatism. He further states: "I can not praise Gin Pills enough. After using them I am now able to go around without a cane."

If your kidneys are not efficiently disposing of the waste matter in your system excessive acidity may develop, resulting in painful joints, sciatica, lumbago. At the first sign of kidney trouble take

GIN PILLS
FOR THE KIDNEY

"and what's more, I think we'd better start right back if we're to go alone. Soon as Mark's better we'll be glad of the chance to come and get him; but really, I'd feel easier to go back to-day."

"He's right, Matthew," commended Uncle Tom. "It's not quite fair for me to steal two of your father's sons and his third man's as well! And as Jack says, it's better for them to start soon and take their time. Run up and say a word to Mark, you two, while Aunt Em gets you a good lunch. You won't mind eating early after the long ride."

"I never saw any sister refuse food, early or late, ride or no ride," grinned Jack as they went upstairs.

They were away by noon, regretful not to stay longer with this hospitable family, but glad to think they would return so soon.

"These plains are such surprising things," said Nancy, when Prairie Ranch and its big cottonwoods were miles behind them. "From a distance they look flat as a huge billiard table. Who would believe that there are mesas and hills out here?"

"I like the prairies better from a distance," confessed her brother. "They're so desolate and lonely when you're on 'em, Sis. Makes you feel no bigger than a mosquito, and about as important! It's great to come out here and see them, but give me the mountains as a steady diet. I—"

"The boy paused, brushing one hand against his cheek.

"Queer, but I'd swear a snowflake hit me! Why, there's another! Strange to see snow drift down this way while the sun's still shining!"

"I've seen that happen several times this winter, but it never amounts to very much," Nancy perceived curiously at the heavens. "Just see that cloud, Jack! How fast it's moving. I bet that's where your snowflake came from!"

A worried wrinkle appeared between Jack's eyes.

"Maybe Cousin Columbine was right, and we're in for a storm."

Nancy laughed.

"Lost on the prairie in a blizzard on the twenty-sixth of March! It would be some story to tell the folks back home!"

Jack said, his eyes following the cloud: "Don't tempt Providence, Sis. That cloud is turning lanky, and blizzards on these plains are something awful, they come so suddenly. Mr. Adam told me about a time—"

A gust of wind was on them before Jack finished speaking. Big balls of timbered scurried across the prairie, and clouds of dust obliterated the road.

"Perhaps we'd better turn and go back," suggested Nancy, ducking her head against the particles of dust.

"Cousin Columbine insisted we mustn't start in any sort of storm, you know, and—" (her voice rose in alarm) "and it's really snowing! It's beginning to snow hard!"

The boy leaned forward, scanning a sky that grew darker with incredible rapidity.

"How far back did we pass that schoolhouse?" His voice, Nancy noticed, was tense, unnatural. "I don't want to scare you, Sis, but this looks bad to me. If we could reach the school I'd take a chance at waiting there until the worst is over. What do you say?"

"I say we keep right on to the first ranch. That school was six or eight miles back; and when we passed I noticed particularly that the bus had left. Perhaps they closed at noon to-day?"

A stinging flurry of snow was on

them now, cutting across their faces like a whip. For a moment it took Jack's breath away; then he replied: "I guess you're right. There was a ranch somewhere along here. I remember seeing the gate and mail box. Help me into this jacket, will you? I don't want to stop the car. Goah! Nancy, we're headed straight into the storm. That's it!" (as she struggled to get his arm into a sleeve), "don't bother about the other. Get into your own coat quick—or wrap it round you. Look at this snow! The windshield's covered already. I'll have to get out and wipe it off."

"Are there any side curtains in this old car?" cried Nancy, as they started on after a short delay.

Jack shook his head as he bent tensely over the wheel.

"Darned if I know; and you couldn't put 'em on in this wind anyway. Keep your eyes peeled for that mail box, Nancy. We mustn't miss it. We—we can't miss it. Do you understand?"

Nancy understood only too well. There followed a mile or so when neither spoke. Twice Jack got out to wipe the glass, while his sister, staying into the wind-swept space, fought terror. Snow was descending fast and furiously now. Indeed, as they kept on doggedly it seemed incredible that this was the same road they had traversed so short a time before with friendly sunlight dappling the plains on every side. It might, thought Nancy, have been snowing here for hours and hours.

Could it be possible that they were off the road? Straining her eyes into the drifting white, watching in desperation for the wayside mail box, visions of frozen cattle rose up before her, and the girls' heart thudded.

"I bet Jack said, not looking at his sister: 'We've missed that ranch, Nancy. It can't have been as far as this. What say we turn back now and try to reach the schoolhouse? The wind would be behind us anyway; and as it is I can't see four feet ahead. It looks to me as if our best chance was to—'

The words were silenced by a cry from Nancy, a cry of warning that came too late. Jack jammed on the brakes so suddenly that his sister was thrown forward against the windshield just as the car collided with the engine of a big school bus, which stood, its back wheels resting in a snow-filled gully as it extended crazily across the road.

CHAPTER XVIII

As Nancy righted herself again, her eyes met Jack's, a glance of stark despair passing between them.

"I'm afraid that crash has finished this old car," he told her; then added: "Why, Nancy, I think that bus is full of children!"

"Hi, there," came a voice almost at his elbow. "Had a smash up, didn't you? Did you meet Clem?"

Jack turned to see a boy of perhaps eleven, standing amid the swirling snow.

"Skip back into that bus, kid," he shouted, "we're coming too!"

He was already out, stretching a helping hand to Nancy, and together they fought their way to the door of the stalled bus, the youngest calling over his shoulder: "Watch where you go there! Don't step into that deep rut, Miss—you gotta jump it!"

Then as the door flew open to admit them and Nancy, exhausted, sank into the nearest seat, he continued with a captivating grin: "We got

company, kids. These folks are changing cars at this station. Say?" (turning to Jack), "did Clem Johnson send you after us?"

Jack shook his head, and glancing about the bus, inquired, "Is he your driver?"

"Come to to-day. Our regular driver's sick," explained the boy. "Just down with an awful pain when he was sweepin' out the bus this morning, and his wife got Clem to drive us. Teacher closed school early because there's some sort of convention in Denver to-morrow, and she wanted to take a train this afternoon. The storm came awful sudden, after we left; and when we got this far Clem said we'd better get back to Bartlett's ranch fast as we could. That's more of a few miles east of us; but when he tried to turn, the wheels went into that gully and somethin' broke. Clem worked for a long time and couldn't fix it."

"So he went for help?"

"That's it. He thought he'd get there easy; but the wind got some 'thin' fierce after he left. We told him not to go, but he said we'd freeze to death out here and 'twas up to him to get us somewhere safe. He's been gone a terrible long time though. Say, what's your name?"

"Jack Nelson; and this is my sister Nancy. What's yours?"

"Tom Osgood. I'm the oldest feller here; but two of the girls are older'n me. What do you s'pose became of Clem? He ought to be here."

At the front of the bus two children began to cry; and looking about at all those helpless youngsters, Nancy forgot herself. There must be fifteen of them; and two lovely little girls, obviously twins of seven or eight, wore only sweaters over summer dresses. How cold they must be!

"Look here," she said, rising to speak quietly, "these poor kiddies are getting frightened. We must divert them, Jack—play games of some sort—keep them moving as much as possible in this crowded place. Why, I'm cold already even with this coat, and not one of those children is dressed as warmly! Let's start romping soon as I put my sweater on one of those little girls."

This worked for a time, and the smallest children, not realizing their plight, laughed with delight at the games Nancy invented. The older ones, however, grew noticeably quiet as time passed, trying to peer out of the snow-covered windows, and speaking together in low voices.

At last Jack and Tom Osgood started some wrestling matches at the rear of the bus; while the older girls roused themselves in an effort to keep the others occupied. They danced, jumped up and down, and did gymnastics; but despite this exercise they were growing colder every minute, and when during some roughhouse, a small boy's elbow went through a pane of glass, a cry of dismay arose from one and all. 2117

It was then that Tom Osgood had an inspiration. Stored under the back seat and carried for just such emergencies, were canned food and a small, portable stove.

"I'll say we were pretty dumb not to think of 'em before," he observed disgustedly, "but we've never had a chance to use 'em, and I guess every one forgot!" He had been rummaging about on his hands and knees, and now stood up, a bewildered expression on his manly little face. "Why they're not here! Not anywhere! We've always carried 'em, and stored 'em, and I say! I bet I know what happened. Joe took 'em out when he cleaned the bus this morning, and forgot to put 'em back when he had that pain. He always sets 'em in the harness closet out of the dust; and maybe Clem s'posed they were right here, or y'p'ose he didn't know they'd ought to be here. Gee! I'm hungry, and some of that canned soup would have tasted good."

There followed another fruitless search, the children watching with strained, unchildlike faces.

"Don't cry, kids," said Jack, as a small girl burst into frightened tears. "I'm going to make a stove out of this milk can. We'll soon be opening windows to cool off!"

Nancy forced a smile at her brother's attempt at cheer, and lifting the crying child onto her lap, wrapped her coat about the small, cold legs. The bus was shaking with each gust of wind, and though every window was thick with frost, she knew the storm had increased in fury.

(To Be Continued)

Little Helps For This Week

And when ye stand praying, forgive if ye have aught against any, that your Father which is in heaven may forgive you your trespasses. But if ye do not forgive, neither will your Father which is in heaven forgive your trespasses. Mark 11:25-26.

"Is not enough to mourn your sins,
'Tis but one step to heaven;
When you are kind to others—
Then
You know yourself forgiven."

There is nothing to do with your fellow men but to love them, to contemplate their virtues with admiration, their faults with pity and forbearance, and their injuries with forgiveness. To hate your adversary will not help you; nothing within the compass of the universe will help you, but to love him. How many a solitary place would be made glad if love were there, how many a dark dwelling would be full of light.

THE VALUE OF MONEY.

Some think of the value of money as so many grains of gold. Others say its real value is the goods and services it can purchase. Let us suppose King Midas had turned most of Alberta to gold. We could not use all that gold, and having more than we wanted of it we would not trade anything of value for it. Outside of paying our debts and using it for ornaments, we would have no use for it. So it seems that the quantity of money as of any other goods, or rather we should say the scarcity creates the value.

Ricardo rose to fame by his formula known as "The Quantity Theory of Money," which involved a directly proportional variation in price for every variation in the quantity of money. However, it seems to be the fate of all classical theories which have been greatly admired, to be found later on that they are but approximations of the truth. It was so with this theory, for it was found that other factors entered into prices. Some of these were the rapidity with which money circulates, the use of other forms of credit such as paper money, bank loans and checks, etc., and the number of exchanges such as sales, loans and so forth which are required to be made. Nevertheless the quantity of money is the important factor, and thru its control the general price level may be controlled.

If this were done it would be a great benefit to society, for these variations in price levels cause great disturbances in the business world and thereby much suffering. A rising price level creates a hardship on those working for a salary. A drop in the price level hits the farmers and industrial producers, forcing many thru bankruptcy and at the same time creating more unemployment.

The CCF Meeting.

Owing no doubt to the fact it had not been sufficiently advertised, a public meeting billed for Kelly's Hall for Saturday Evening last failed to bring a sufficient number to warrant holding the meeting. The affair was to have been under the auspices of the Canadian Commonwealth Federation, and Mr. George Bevington, the well-known authority on banking and tariffs, and several other speakers were present. An adjournment was made about 9.30, with the promise that another meeting will be called for Saturday Evg. October 5.

Prosperity Bonds.

Prosperity bonds will be sold to the citizens of Alberta, Premier Aberhart is said to have announced on Tuesday. The amount of the initial issue which the Government hopes to offer before Christmas, has not yet been determined, but it will be designed to take care of the province's maturing obligations during the next 5 years. In following this policy it is hoped to clear away Alberta's public debt of about \$150,000,000 within the next 10 to 15 years. The bonds will be in small denominations—possibly as low as \$10 and \$25, and for long terms such as 10 to 20 years.
